### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a system and method for aiding in a visual diagnostic process including utilizing a knowledge database, classified in class 706, subclass 924.
  - II. Claims 5-24 and 28, drawn to a system for reducing diagnostic uncertainty and assisting in the investigation of a death by user review of images without any recitation of a knowledge database, classified in class 382, subclass 128.
  - III. Claims 25-27, drawn to a system for aiding in the identification of orally-administered drugs and street drugs through user review of images, classified in class 382, subclass 143.
  - IV. Claims 29-30, drawn to a system for assisting in the identification of plants through user review of images, classified in class 382, subclass 110

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as aiding in visual diagnostic processes by utilizing a knowledge base to assist in the diagnosis. Invention II has separate utility such as reducing diagnostic uncertainty through a user reviewing images without the assistance of a knowledge database. Invention III has separate utility such as identification of drugs through user review of images. Invention IV has separate utility such as identification of plants through user review of images. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3621
